

## **Program Executive Office for Simulation, Training & Instrumentation**

# Army Training with Distributed Networked Systems

**Roger Smith**  
**US Army PEO STRI**  
**[roger.smith@peostri.army.mil](mailto:roger.smith@peostri.army.mil)**

Undersea Distributed Networked Systems Conference  
February 13-15, 2007  
Newport, RI

# Leadership is Essential

“A nation which depends upon others for its new basic scientific knowledge will be slow in its industrial progress and weak in its competitive position in world trade.”

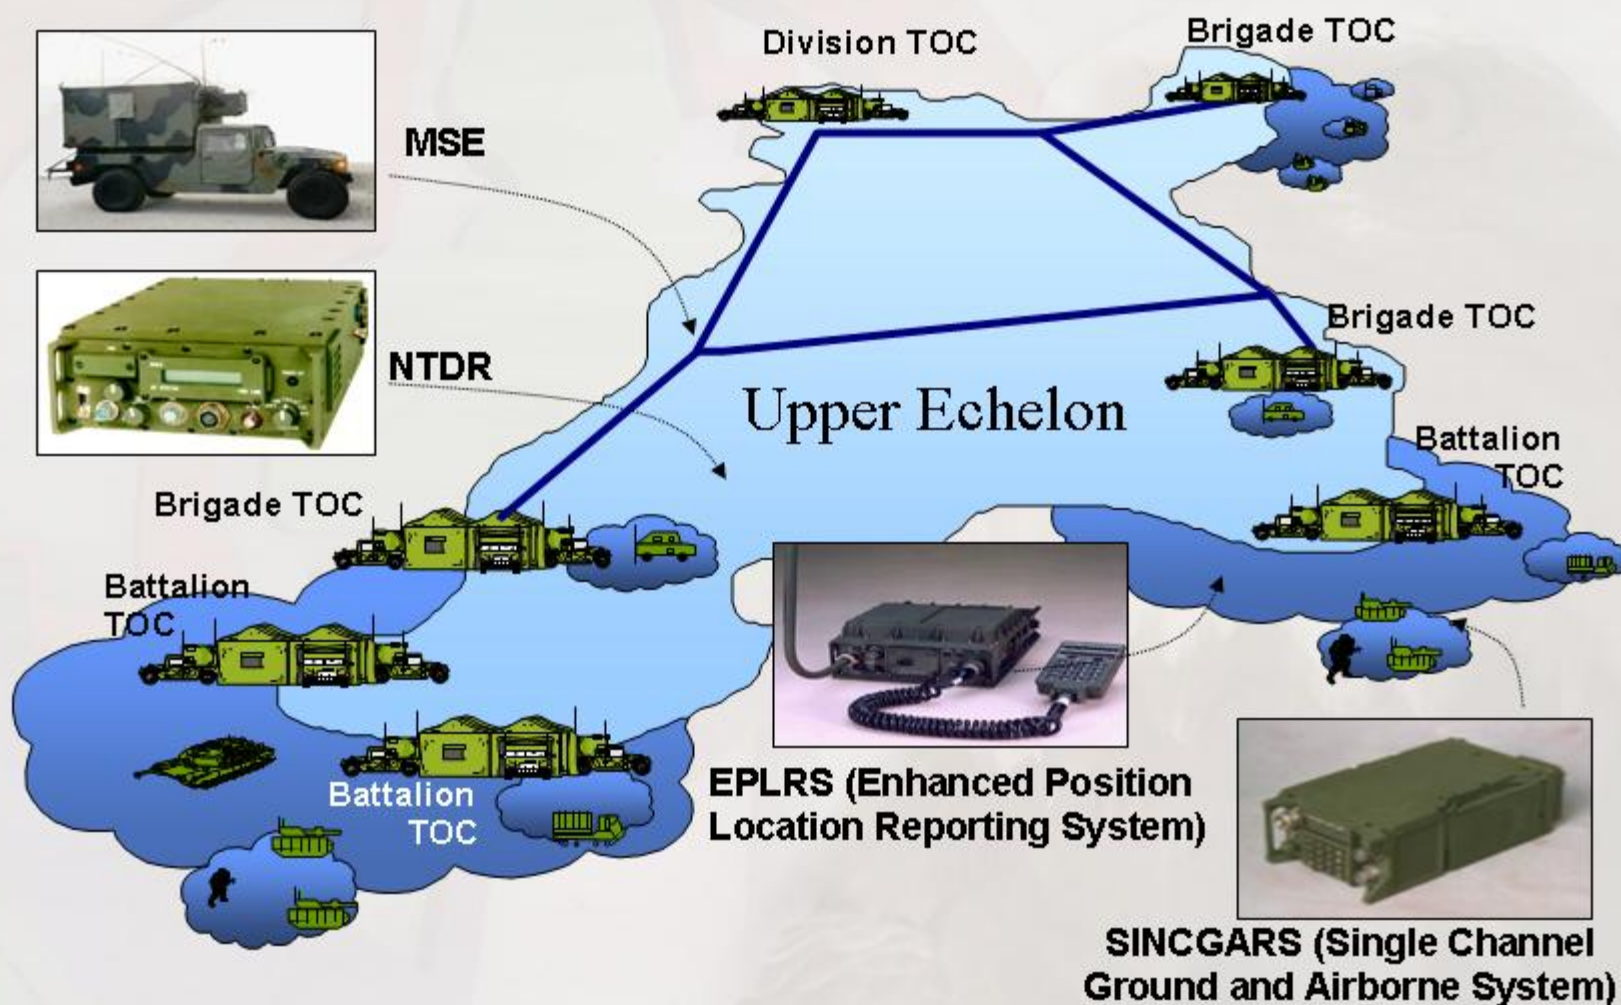

Vannevar Bush

*Science, The Endless Frontier*, 1944

# Current Battlefield Networks

# Emerging FCS Communications

- **UofA vehicular-based backbone services**
- **Soldier Radio Waveform provides similar services to attached networks**
  - ❖ Dismounted Soldier – Objective Force Warrior
  - ❖ Unattended Ground Sensors – UGS
  - ❖ UGV (SUGV) / UAV (Class I and II)
- **JTRS Cluster 1 radios on vehicles simultaneously support both WNW and SRW for seamless access and operation**

# Live Training Environment

## Digital Tactical Monitoring

## AAR

## Observer Controllers

## EXCON

## FTI

## Training IED

## Player Units Targets

# Beyond Industry Boundaries

“Innovation requires building a community of like-minded and wholly committed individuals who see their shared future in the success of the emerging technologies and industries.”

- Andrew Hargadon, Univ of California

“Moving among industries frees you from the dogma of any one industry and their firm belief in the links between problems and solutions.”

- Gian Zaccai, CEO of Design Continuum

# Waves of Change are Building

IT Services

Game Tech

Military Training

Computer Performance

Networking

# Radical and Incremental Waves

Innovation & Benefits

Dewar, R.D., & Dutton, J.E. (November, 1986). The adoption of radical and incremental innovations: An empirical analysis. *Management Science*. 32(11), 1422-1433.

# Technology Adoption

Technology Advantage

Smith, R. (2007). "Game impact theory: Five forces that are driving the adoption of game technologies within multiple established industries". *Games and Society* (under review).

# Successive Waves of Adoption

Smith, R. (2007). "Game impact theory: Five forces that are driving the adoption of game technologies within multiple established industries". *Games and Society* (under review).

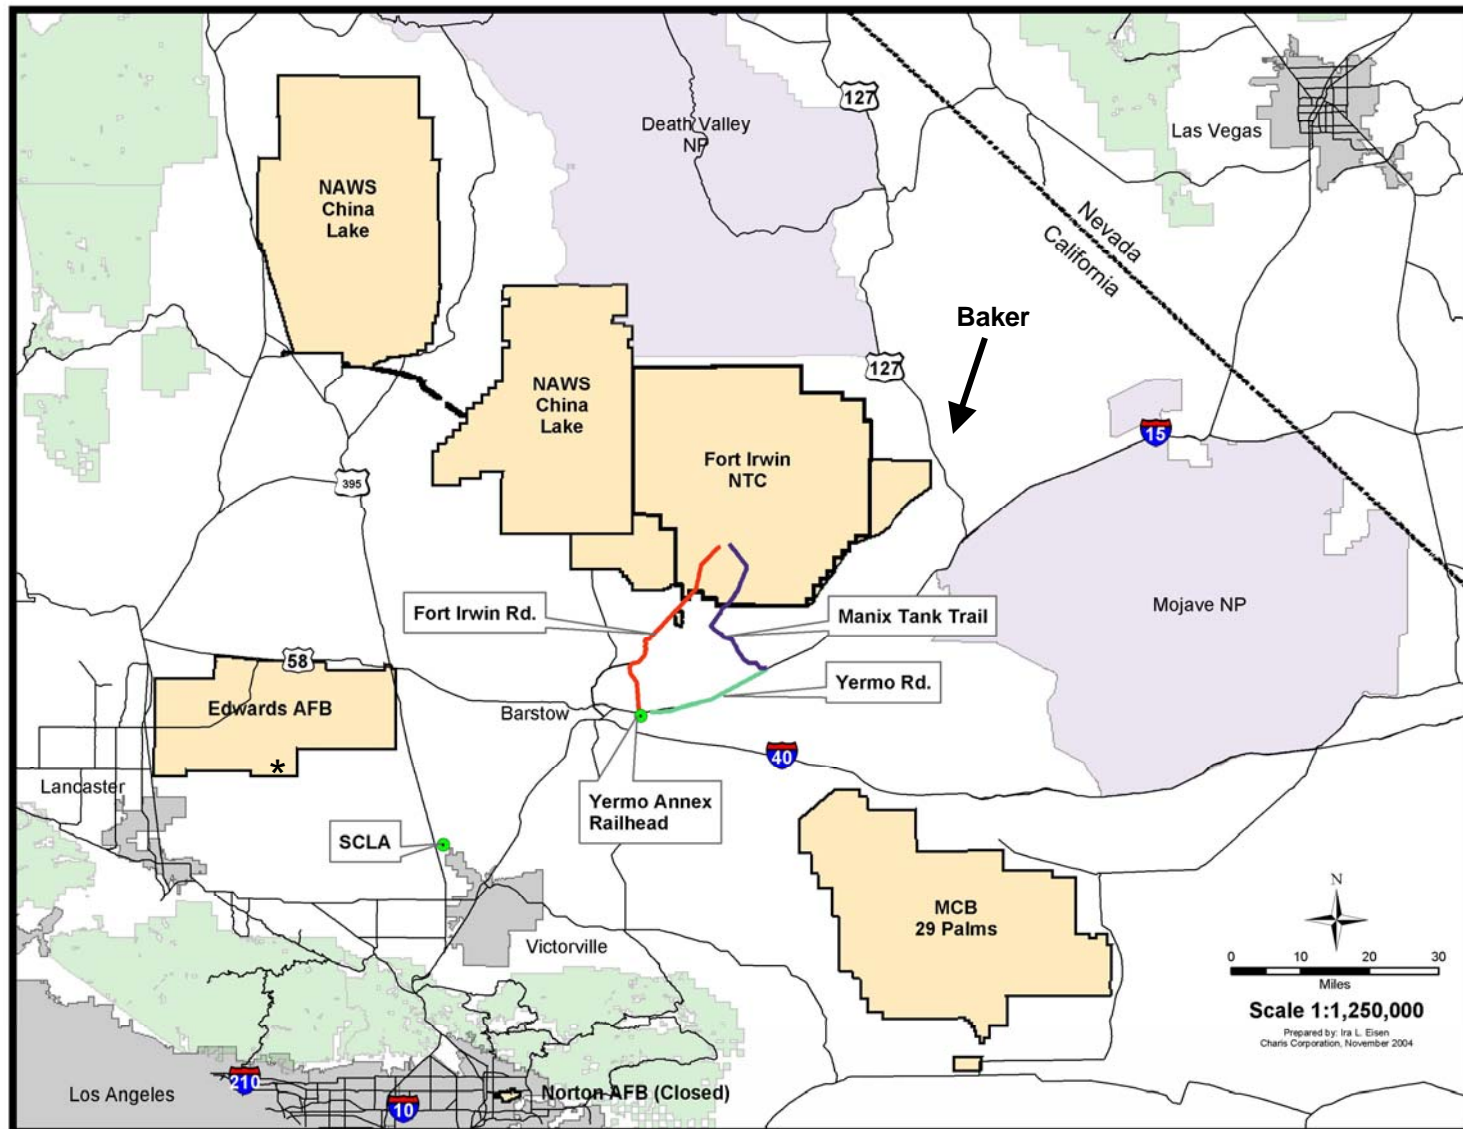

# National Training Center

# National Training Center

# Collaboration in the Mojave Desert

**Each range or agency has its own mission objectives**

## Scientific Research

**NASA/Goldstone  
NASA/Drydent FTC  
JPL/Pasadena**

## Training

**NTC - FT. Irwin  
Nellis AFB  
NAS Fallon**

## Testing and Development

**Edwards AFB  
China Lake  
Nellis FTC  
NAS Fallon  
Pt. Mugu**

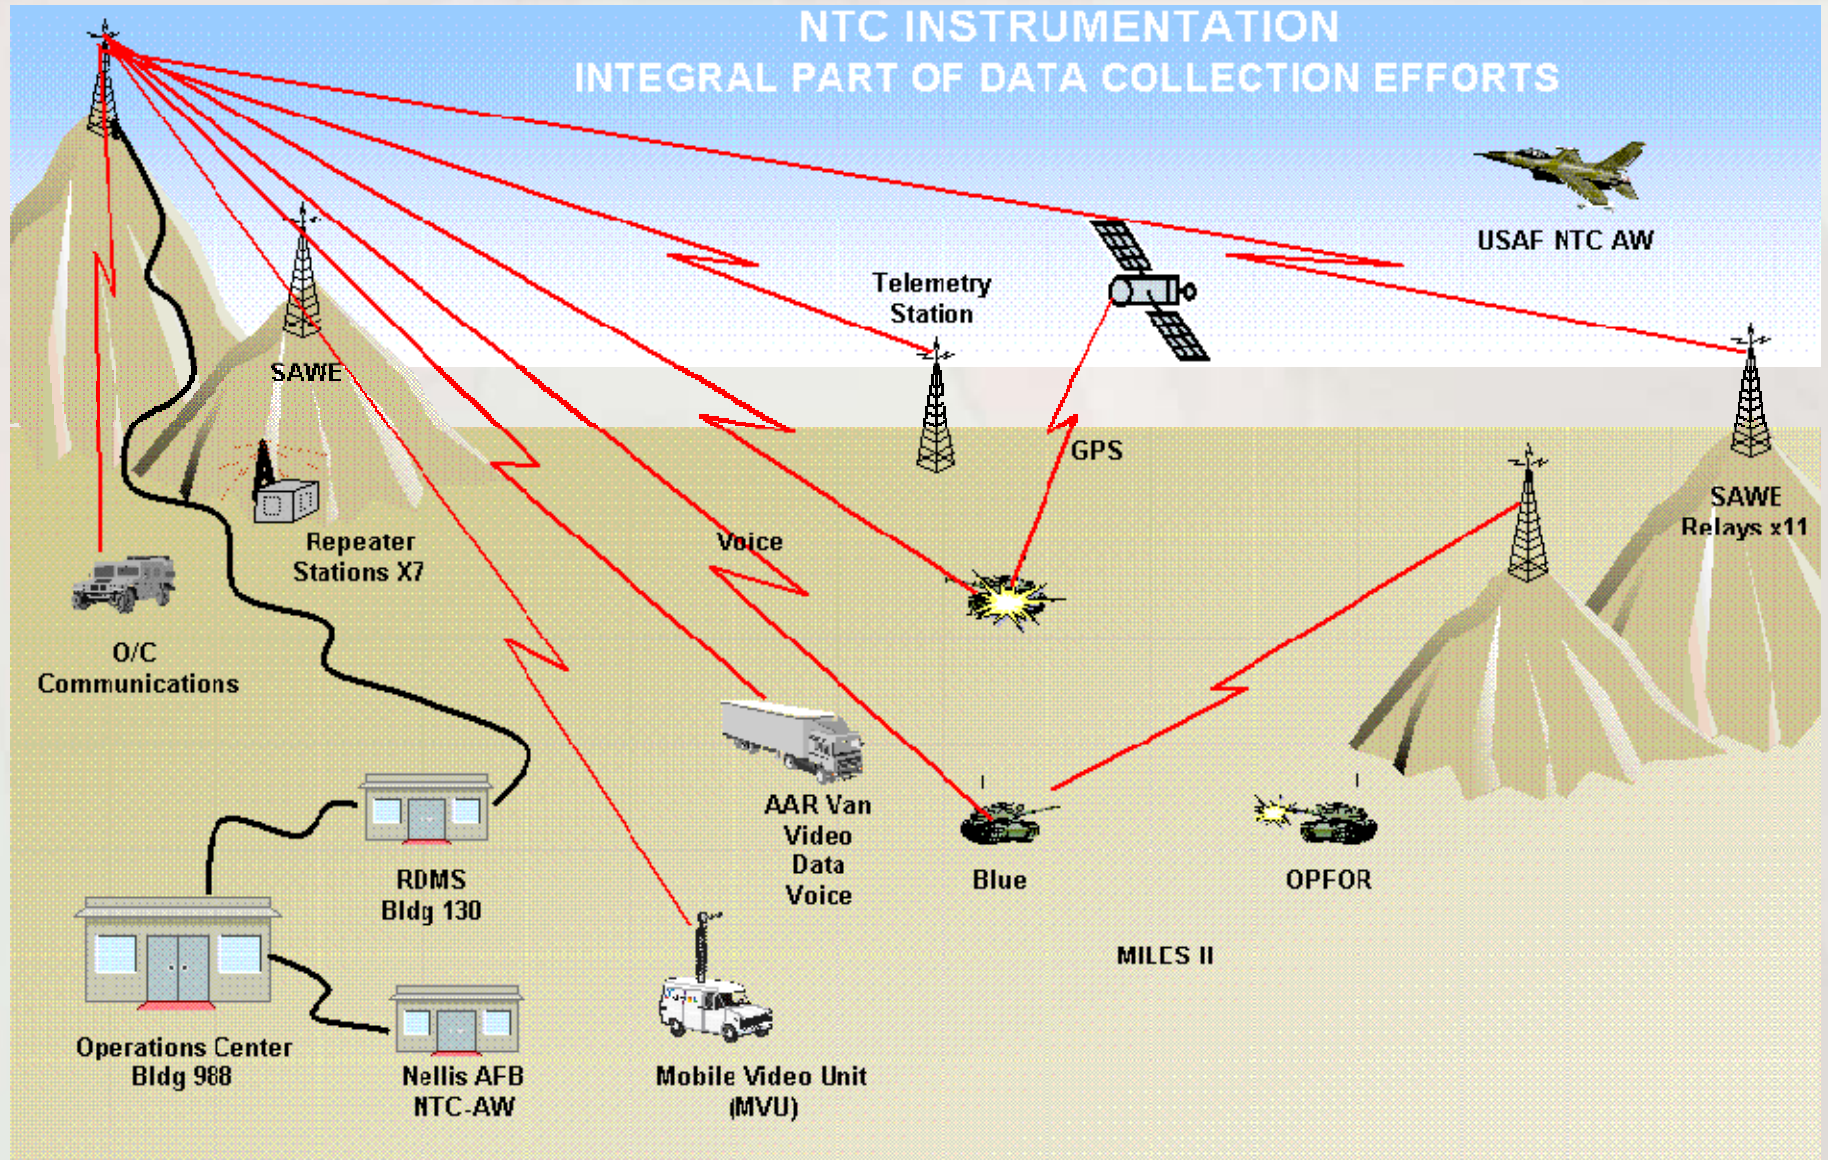

**Threats  
F-22  
Global Hawk  
33 UAV programs  
Joint Exercises  
Top Gun**

**Trident II Launch Evaluation  
Cruise Missile  
Deep Space Tracking  
Space Exploration (SOHO)  
10 Army Rotations a year**

**Scientific, training and tactical spectrum needs  
must be accommodated without conflict**

# Current NTC Instrumentation

# RF Terrain Masking at NTC

- OIS Receiver Threshold -86 dBm
- 20 Tower Sites
- 470 MHz

# Ad hoc Wireless Network

- Ad hoc -> Created for a particular purpose
- Wireless -> Mobile hosts
- Network -> Information sharing
  
- Ad hoc wireless network:
  - ❖ Information sharing between mobile hosts for a particular purpose
- A.K.A. Mobile Ad hoc NETWORK (MANET)

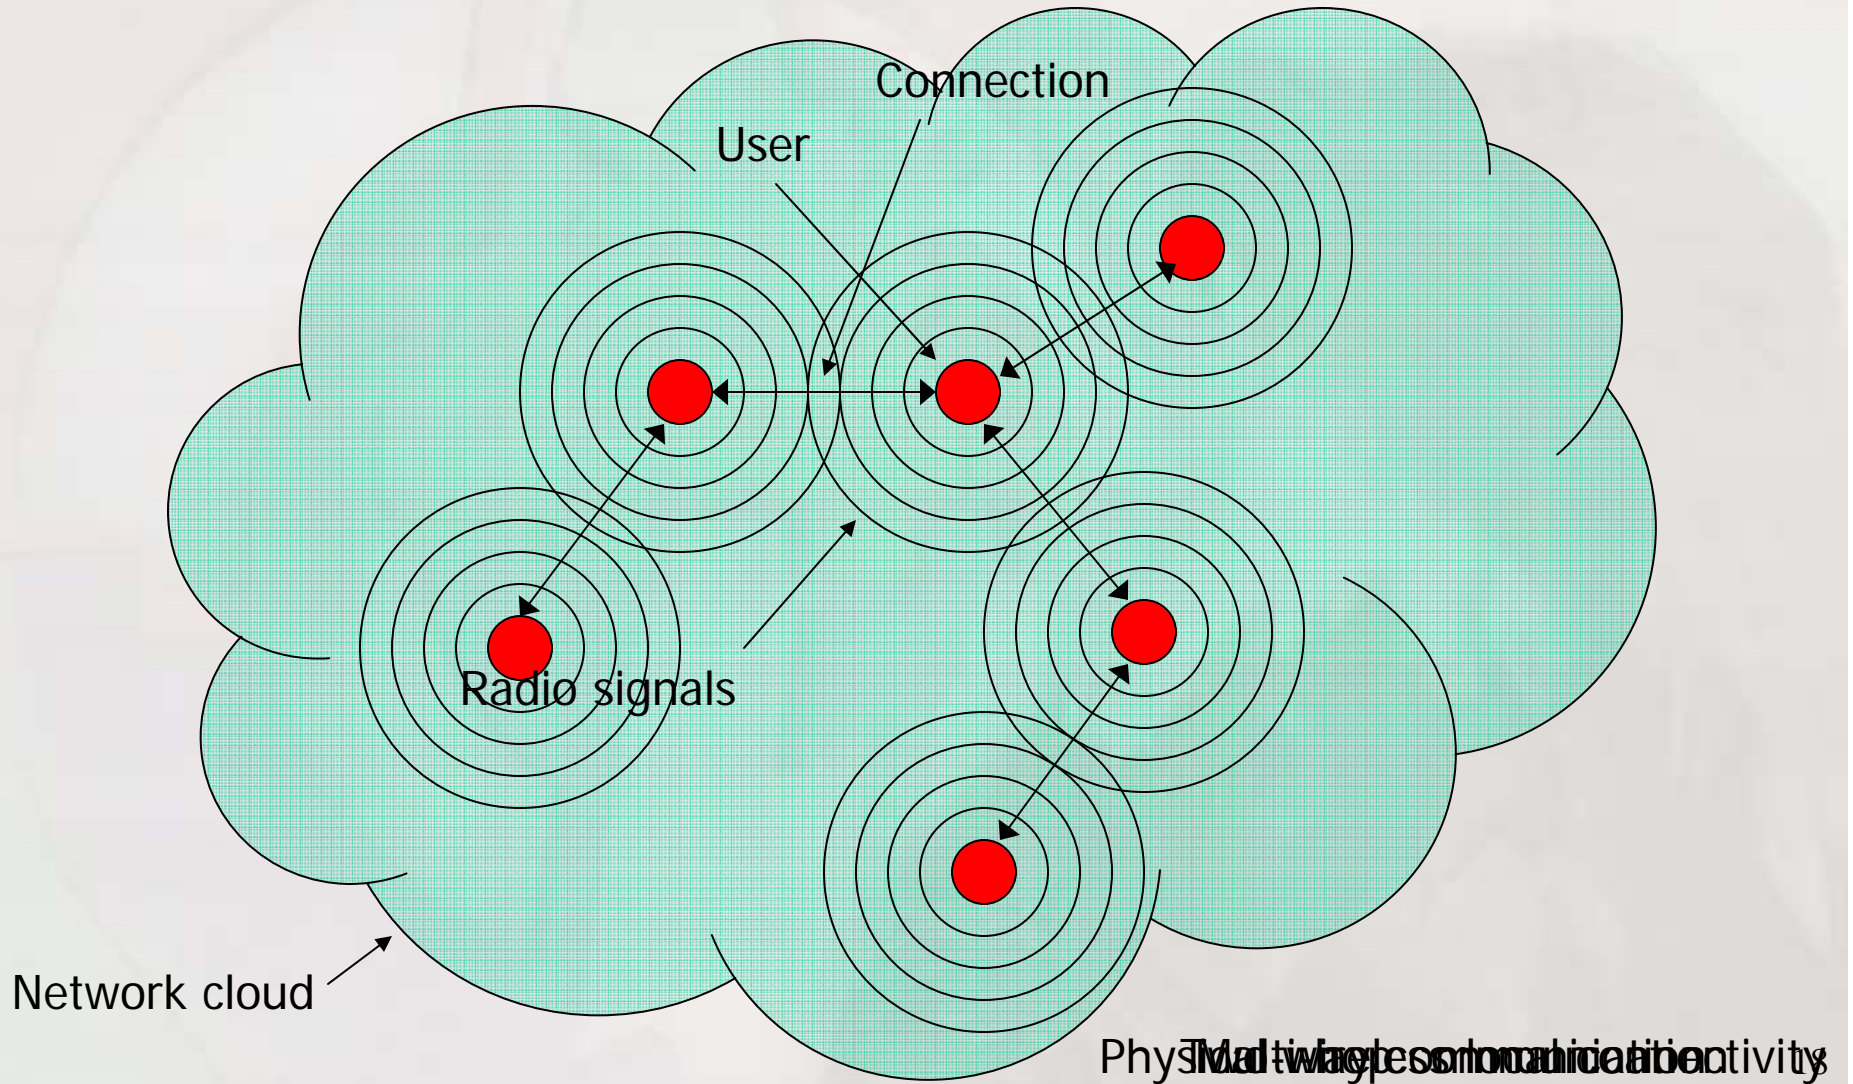

# Mobile Ad hoc Networking

- MANET: Peer-to-peer wireless networking
  - ❖ Mobile nodes relay each others' packets
  - ❖ No designated base stations (not hub-and-spoke)
- Advantages
  - ❖ No infrastructure necessary
  - ❖ Dynamic topologies
  - ❖ Can operate with short radio ranges to save power
  - ❖ Can extend coverage/connectivity (e.g. around obstacles)
- Drawbacks
  - ❖ Scaling is problematic, especially for non-local communication patterns
  - ❖ Paths break frequently  $\Rightarrow$  excessive routing overhead
  - ❖ Energy constrained

# MANET Concept

# MANET At Work

# From Big to Open Systems

- Design Big Systems
- Build Big Systems
- Run Big Events

- Design Open Systems
- Build Open Systems
- Run Open Events

Central Control

Shared Control

Resources Must Be:

- Abundant
- Reliable/Robust
- Trusted/Secure

# Conclusion

- Computing, communications, and distributed systems are evolving quickly.
  - ❖ Large and Monolithic are being replaced with Open and Flexible
- Commercial industries are driving many of the technologies for products like
  - ❖ Cellular communications, IT services, Multiplayer games,
- DOD training is in a position to significantly leverage commercial advances in these areas
  - ❖ e.g. MANET, MMOG

## Presenter Info

Dr. Roger Smith  
U.S. Army PEO-STRI  
12350 Research Parkway  
Orlando, FL 32826
